

Unbridled Success

From Germany, via Europe and on to the rest of the world – the pathways of RAPOOL's success are limitless: rapeseed varieties, know-how and consulting – a real one-stop solution.

The oilseed rapemarket is growing

Studies and forecasts clearly show that oilseed rape acreage is on the increase worldwide. High-grade varieties with high output potential are becoming more and more important for yield increases in these areas.

The location determines the variety

Each region has its own agroclimatic pre-requisites. Thanks to our longstanding experience and numerous breeding and testing centres, RAPOOL has been able to develop high-yield varieties for every type of climate and every location. In addition, RAPOOL provides comprehensive consultancy and offers on-site support for growers in word and deed. Whatever your needs, whether seeds, agronomic advice or crop-specific production technology – RAPOOL has the answer, giving growers more success with oilseed rape.
